JAIME MUSTARD

THE **ICONIST**

JAIMIE MUSTARD

JAMIE TEACHES THE SCIENCE OF WHAT CAUSES ANYTHING TO STAND OUT IN THE MODERN WORLD.

Through his work Jamie has observed the primal laws of **BLOCKS™** which explains why anything **STANDS OUT** and endures the mind - or fails to. In his pending book, *The Iconist*, through pop stories and comprehensive research, he shows how **BLOCKS™** solve the problem of us all being made invisible as we compete for less and less available attention in a messaging and media oversaturated world.

He teaches how **BLOCKS™** allow anyone in any field to **STAND OUT**, at will, based on the natural and primal laws of human perception. As host of the popular RadioActive talk show on KXL 101.1 FM in Portland, Oregon, Jamie interviewed hundreds of designers, innovators, artists and agents for social change who are having an impact all over the world.

An avid consumer of popular culture Jamie is a graduate of the London School of Economics. He is obsessed with the "economics of attention" and has consulted for Intel, Cisco and Symantec.
